Malaysia

Dear Lim Zhi Yeng

First of all, I would like to express my exhilaration in applying for the position of Web Developer Intern with Ipg Mediabrands Sdn Bhd. Currently studying software engineering at Sunway University, I have honed skills in PHP, HTML, CSS, JavaScript, and MySQL, with experience in both front-end and back-end development. Some of my experiences have included collaborative, team-based projects whereby I employed creative thinking and technical skill in developing functional and helpful web solutions.

My practical experience extends to using GitHub for version control and proactively contributing valuable input to projects that emphasize user experience and innovative design. I can work under tight deadlines throughout the project lifecycle, including data analysis and turning analysis into insight for campaign effectiveness, fitting well with your requirement for time management and creative problem-solving.

I'm eager to apply my skills in providing innovative digital solutions for Ipg Mediabrands Sdn Bhd. Thank you for your consideration, and I look forward to an interview to discuss how my skills could serve as a contributor to your team.

Yours Sincerely

Muhammad Muad Thaha
